To: The Commission

#### PETITION AGAINST RULE MAKING

I, Dennis M. Jones, K6RCL, hereby respectfully submit my request to the Federal Communication Commission to NOT to take action on this petition for rule making, RM-7869, as submitted by the American Radio Relay League.

As an active Amateur operator on the 1.25 Meter Band, I have seen this band grow from a few user's to extremely dense population of

ARRL did not even follow up on the information they received from these other groups. ARRL themselves has supported regional frequency coordination efforts by amateur groups. Quote "in some cases, however, local conditions may dictate a variation from the national band plan. In these cases, the written determination of the regional frequency coordinating body shall prevail and be considered good amateur operating practice in that region." Unquote.

What we do not need is more intervention by government, what we do need is to communicate with local area coordination councils and resolve the problem at the local level.

For the above mentioned reasons, I respectfully ask the Commission to abandon the proposed allocation of the 222.000 to 222.150 MHZ, to weak signal, and instead defer the matter back to the ARRL for resolution with the local area coordination council. In this case the local area council would be 220 MHZ SPECTRUM MANAGEMENT ASSOCIATION OF SOUTHERN CALIFORNIA.

Respectfully Submitted,  
December 17, 1991
